SolarCrate GenaCrate-M Mobile Solar Generator

*The ultimate solution in
portable solar power has arrived!*

An eco-friendly system, the GenaCrate-M
does not use fossil fuels of any kind.

Five years in development, the GenaCrate-M represents the culmination of field-tested components combined with the capability to handle large loads in a simple to operate, highly mobile platform that will provide instant power where and when you need it. Durability and sustainability are engineered into the design by using only quality components from reputable manufacturers. Easy one person setup combined with single switch operation makes for hassle-free deployment. The GenaCrate-M requires virtually no maintenance and even when stored, the solar panels keep the battery bank charged and ready to go.

Use the GenaCrate-M for:

- Emergency power for the home or farm
- Building contractors can run a jobsite
- Cabins

- Tiny Homes
- Disaster response
- Silent power for parties, weddings, and other outdoor venues
